Script to introduce WFI-EZ

To Caregivers/youth

Our agency wants to know how good its services for young people are. We also want to know what children and families in our program think about our services.

To find out your opinions about the services you have been receiving, we would like to have you complete a short survey. This is a chance for you and other youth/families like you to let people know what you think about the services and what things you would like to see changed.

All of your answers will be kept completely confidential. We will not reveal your answers to anyone. We will only report what all the youth/families answered as a group. The answers are for a research project that will be analyzed outside of the agency.

I will give you a survey to complete. The survey takes about 5-10 minutes. When you are ready, you may take the survey out of the envelope. When you are finished, please return it to the envelope and give it back to me.
